## OBJECTIVE

A passionate Computer Science student seeking an internship to apply programming, web development, and data analysis skills in a practical environment.

## EDUCATION

**University of Nevada**, Reno, Nevada

- B.S. Computer Science, Minor in Mathematics & Statistics, Minor in Big Data – 2027
- GPA: 3.5/4.00 | Relevant Coursework: Digital Design, Data Structures, Algorithms, Database Management, Data Visualization, Intro to Big Data.

## TECHNICAL SKILLS

**Languages:** C++, Python, JavaScript, Julia, PostgreSQL, R

**Web/Tools:** HTML, CSS, Excel, Word, Tableau, Power BI, VSCode, GitHub, Jupyter Notebook

## PROJECTS

### Digital Design Project

- Designed and implemented a digital circuit using AND, OR and NOR gates to perform a specific logical function.
- Successfully simulated and tested the circuit, demonstrating proficiency in digital logic design.
- Applied digital design principles and problem-solving skills.

### Basic Web Project

- Built simple websites using HTML, CSS, and JavaScript.
- Implemented interactive features and a clean layout.

### Tic-Tac-Toe Game

- Developed a console-based C++ game with user input and game logic.
- Focused on algorithms and programming fundamentals.

### Database Management Project

- Developed an outfit planner that helps users plan their outfits for an event or the week
- Implemented CRUD operations to add, delete, update and retrieve wardrobe data
- Created relational database tables to store each variable for each category
- Used queries to filter outfits.

## EXPERIENCES

### Summer Student Program, (Chemical Engineering Student) Nevada Gold Mines – June 2023–August 2023

- Entered and maintained structured data in company software systems, ensuring accuracy and consistency.
- Followed standardized operational procedures to support efficient workflows and process improvement.
- Performed precise measurements and sample preparation, ensuring data reliability and quality control.
- Reported experimental results to supervisors and team members, demonstrating clear communication, attention to detail, and teamwork.

### Assistant Home Manager, Hope Healthcare Services – November 2022–Present

- Manage individual records and documentation while balancing school responsibilities, demonstrating strong organizational and time-management skills.
- Administer medications and provide CPR training support, ensuring accuracy and adherence to protocols.

- Maintain digital and paper records, showcasing attention to detail and data management abilities transferable to tech roles.
- Collaborate with team members to streamline daily operations and ensure high-quality care, demonstrating problem-solving and teamwork.
